Objectives

01 Educate

Train young people in skills that help them to find a job and fulfil themselves professionally. Among these skills we have identified: flexibility, goal-oriented thinking, decision-making and teamwork, leadership, confidence, active participation, cooperation, ability to work in an international environment, and ability to create networks.

02 Empower

Increase the skills of youth workers to support and empower young people in building their working future, especially by involving those with fewer opportunities.

03 Diffuse

Exchange skills and best practices internationally between organizations working in the youth field, developing a sport-based educational methodology to face youth unemployment.

Architecture of Work Packages (WP)

WP 1

Project Management and coordination

Ensures effective project coordination, budget and timeline management, and continuous monitoring and evaluation of activity quality.

WP 2

Impact & Dissemination

Promote the project activities and results, reaching young people, youth workers and organization working in the field of youth (at local, national and international level).

WP 3

Elaboration of Education Contents

Develop high-quality project deliverables, including the training manual and project videos, providing practical and sustainable resources that youth workers can continue using beyond the project's lifetime to empower young NEETs through sport.

WP 4

Implementation of educational activities

Implement educational activities to test the educational content, exchange good practices, strengthen youth workers' capacities and empower young NEETs across partner countries through a training course for youth workers, a youth exchange, a job-shadowing activity and local workshops.

Jordan

16 participants

Job- shadowing

Croatia

Project Impact

Best Practice 1

Integrate nature and outdoor learning: Combine sport, nature-based activities and learning by doing to make non-formal education more engaging and effective.

Best Practice 2

Encourage learning through challenges: Offer young people opportunities to step outside their comfort zones, such as camping in tents instead of staying in conventional accommodation during youth exchanges.

Best Practice 3

Promote community-based youth exchanges: Involve local communities in hosting and implementing youth exchanges to strengthen youth ownership, engagement and intercultural learning.

Challenges Encountered and Mitigation Measures

⚠ **1. Visa-related challenges:** Visa requirements and limited flexibility in the application process restricted the participation of a wider range of young people.

⚠ **2. Impact of regional conflict:** The war situation required relocating the job-shadowing activity from Lebanon to Croatia. Despite the additional logistical and administrative challenges, particularly the absence of a Croatian embassy in Tunisia.

→ Solution:
Flexibility in Activity Implementation:
Allow greater flexibility to replace international activities with equivalent local activities when visa restrictions or geopolitical circumstances prevent participation, ensuring that project objectives and learning outcomes are still achieved.

Project Sustainability Prospects

1. **Capacity building:**
ToT participants were selected from active youth sector professionals committed to supporting youth activities and NGOs, ensuring continued application of the methodology.

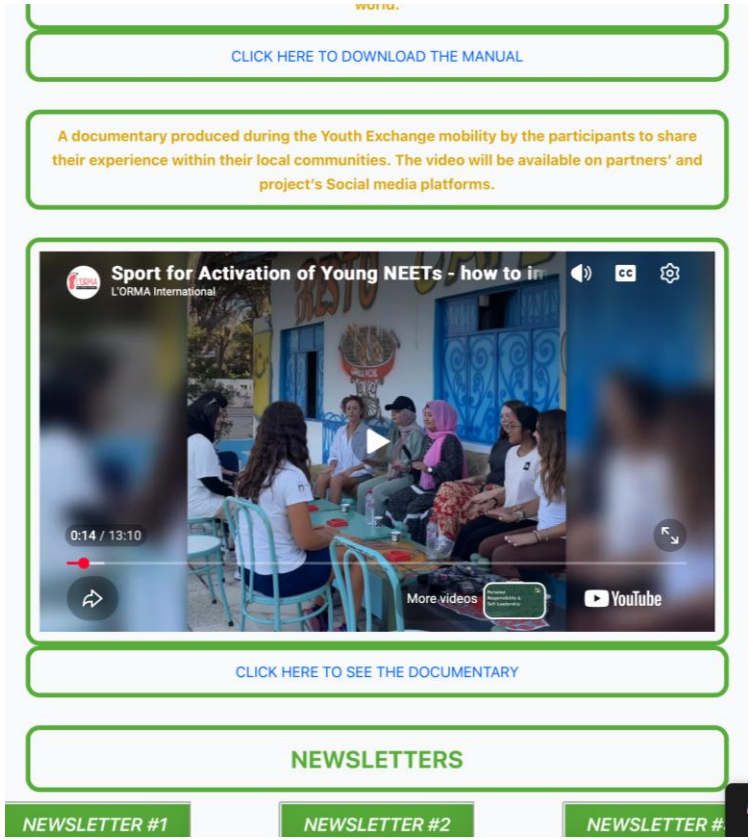

2. **Accessibility:**
The training manual is available on the project website, ensuring free and continued access to its resources beyond the project's lifetime.
